OUR SERVICES

Translation:

We offer the following types of translation services:

Simple translation.

This option applies to any type of document, which must be previously analyzed to assign a specific linguist depending on the subject matter.

Certified translation.

Our experts (sworn) translators have been approved and certified by various bodies of the judiciary power within Mexico. This type of translation mirrors the format of the source document and applies to any document requiring official certification.

Technical translation.

This option applies to companies whose field or sector requires the use of specialized documents containing information and processes that are specific to each line of business.

Style-editing.

We use this service to correct grammar mistakes, typos, spelling and style errors in the target language (language into which text is to be translated). We make improvements to the required terminology in order to render a consistent text according to the appropriate syntax and style of writing.

Urgent translation

We know there are situations that are subject to time-restrictions and we'll be glad to address them.

**ENGLISH FRENCH PORTUGUESE GERMAN
SPANISH ARABIC RUSSIAN ITALIAN
AND MORE**

INTERPRETATION.

Consecutive.

The speaker talks and makes appropriate pauses to allow sufficient time for the interpreter to translate each message verbally. This service is ideal for individuals or small groups of persons.

Simultaneous.

The interpreter renders a verbal translation of a speech from an isolated interpretation booth. The speaker talks using a microphone while the interpreter listens through a transmitter and delivers the translated message to the audience by means of headphones. This service is ideal for conferences, congress meetings and courses. It is worth noting that in the case of events lasting more than 2 hours, two interpreters are needed to ensure a top-quality service.

Subtitling.

This is the translation and codified adaptation of a text for video

Transcription

This service involves transcribing the content of an audio or video.
